

We, with the help of local and Diasporas communities are providing best educational services to marginalized groups across Khyber Pakhtunkhwa in an effort to bring about a sustainable positive change through education. While we are on board making efforts for getting local community involvement to make the system a community-based one at the local level through formulation and management of Community Education Committees (CECs) in all school locations, we also need your support to help us with our activities for continued contribution to social development.

We request you to join us in sustaining and widening our outreach to deserving children for an enlightened, tolerant and prosperous Pakistan. Help us make a difference!

You can extend your support through making cash donations, constructing school building, taking up students sponsorships, donating school/ educational material and items.

Donations through Direct Deposit
